Professional Summary

High-potential Data Science undergraduate with a strong foundation in MLOps, automation, and financial stewardship. Capable of bridging technical AI deployment with fiscal reliability, supported by academic research in digital branding. Proven track record of high-accuracy financial operations and designing automated, data-driven architectures for the digital economy.

Technical Skills

Programming & Data:

- Python, React, JavaScript, HTML5, CSS3, SQL (MySQL)
- Pandas, NumPy, Matplotlib, Plotly
- Power BI, MongoDB, Firebase, MS Excel

MLOps & Cloud:

- Docker, GitHub Actions, n8n
- AWS (Lambda, Serverless basics)
- Tensorflow, Experiment Tracking (MLflow)

Education

Bachelor of Science (Hons) in Data Science

Expected January 2027

SLTC Research University

Cumulative GPA: 3.01. Active participant in the 'Winning Edge' Skill Development Programme (Platinum Level).

GCE Advanced Level & Ordinary Level

2011 - 2020

Kg/Bandaranayke National School

- Successfully completed foundational secondary education establishing a strong academic trajectory.
- **A/L Result (Physical Science):** Combined Mathematics (A), Chemistry (B), Physics (C)

Professional Experience

Assistant Treasurer

May 2025 – May 2026

SLTC Media Unit

- Manage fiscal frameworks for major events (Master Designer V2.0, UniTalks), ensuring 100% compliance with university policies.
- Coordinate budget resources across 6 committees, maintaining quantitative precision in high-pressure environments.

Bank Teller

April 2022 – Sept 2022

People's Bank Sri Lanka

- Maintained 100% drawer accuracy while serving 60+ clients daily in a high-volume banking environment.
- Ensured zero compliance errors, translating high-stakes procedural integrity into foundational data handling skills.

Technical Projects

Ceylon Nature (Production AI)

Jan 2026 – Present

Project Leader | React 19, Firebase, n8n automation, Node.js, Docker, AWS

- **Modern Serverless Full-Stack Development:** Developed a high-performance Single Page Application (SPA) using React 19 and Google Firebase (Realtime Database), featuring interactive mapping (Mapbox/Leaflet), secure user authentication, and multi-language support (i18n).
- **AI & Workflow Automation:** Eliminated traditional backend constraints by integrating n8n.io to power an intelligent AI Chatbot (EcoBot) using LLMs and to deploy automated email workflows for seamless booking confirmations.

ML-Ops Automation Framework

Jan 2026 – March 2026

Lead Developer | Python, Docker, GitHub Actions, DVC/MLflow

- Automated the end-to-end ML lifecycle (preprocessing to evaluation) using GitHub Actions for CI/CD.
- Optimized model deployment reliability through containerization with Docker.

Database Architecture

Jan 2026 – Feb 2026

Group Leader | MySQL, Java

- Developed a complete MySQL parking management database script, emphasizing referential integrity and ER design.

Hotel Analytics Dashboard

Aug 2025 – Nov 2025

Backend Developer | HTML, CSS, n8n Automation, Firebase

- Developed an interactive dashboard to track KPIs (occupancy, ADR) and analyze booking trends.
- Cleaned and visualized complex customer datasets to provide real-time operational insights.

Serverless Backend

Jan 2025 – Feb 2025

Lead Developer | AWS Lambda

- Designed and deployed an AWS Lambda serverless backend to process core business logic and HTTP API requests.

Certifications & Research

- **Research (White Paper):** FinanceGuard AI: Multimodal Federated Learning Framework (2026).
- **IBM:** Artificial Intelligence Fundamentals.
- **Cisco:** Data Science Essentials with Python, Data Analytics Essentials.
- **LinkedIn:** R for Data Science.
